The plain truth is that we must make this year our supreme financial effort, as we shall make our supreme military effort. We have given on earlier occasions a variety of reasons why a rigid economy among all classes which are not yet compelled to practise it is urgent and peremptory. These were chiefly economic reasons; but there is a moral reason of the strongest possible kind why our supreme military effort should be accompanied by a supreme financial effort; why the people as a whole should be made to take through their pockets that same intimate share in the prosecution of the war as they take through the hazard of their relatives and

promise of dramatic developments within the next few months, possibly within the next few weeks. But there is an element

With a view to economy. Committees of business men of great experience had been set up in the three freat spending departments—the Army, the Navy, and the Ministry of Munitions—for the purpose of seeing that there was no avoidable waste. GOOD NEWS FROM THE FRONT.

FRONT.

This is the message which the Paris correspondent of the Daily Telegraph sent last night:—Information I have received from two or three different, but equally authoritative, sources enables me to say that what I may call a distinct cheerfulness now prevails among the councils of the Allies. Along the front in France the recent German tactics of repeated spaemodic attacks, obviously in the nature of feelers, have not only brought no result for the enemy, but have without doubt been useful for us. I have it at first hand that all the commanding officers along this front are absolutely agreed that the German losses since the beginning of the year have been much greater than ours, and in many cases double. The longer the enemy spends Limself by this wasteful feeling of our positions the better for us. RECENT FIGHTING AT YPRES. THES,

The French report issued last night records extraordinary aeroplane activity at various points along the front, and fights in the air between French and German aviators. The result of these combats appears to have been overwhelmingly in favour of our French Allies.

Less than four or five enemy aeroplanes were shot down or forced to descend, and one Zeppelin was shot by an incendiary shell, and burst into flames as it fell to

GERMANY'S FINANCIAL RUIN.

Telegraphing from Geneva, Mr. H. Hitherto these banks have been aided by the support from that institution. The losses involved, he states, will be at least £120,060,070, and may greatly exmed this amount. The banker added that if the war continues for another nine months Germany will be completely ruined financially.

The French communiqué also indicates exceptional activity over considerable pertions of the front. South of the Somme, after intense bombardment and gas attacks, the enemy attempted an infantry attack, which was promptly repulsed.

Sir Douglas Halg reports a successful raid by 26 aeroplanes against enemy depóis at Don. Extensive damage is believed to have been done to stores and railway. All the machines returned safely.

Enemy aircraft have also been busy, and have made several night attacks against towns in the British area, but without any mill-tary damage being done.

There has been much artillery activity, enemy trenches about Hulluch and worth of Ypres-Comines Canal being bombarded.

The French communiqué also mentions air raids against enemy munitions depóts.
